Risk Information

Investing involves risks; principal loss is possible. Securities of small companies are often less liquid than those of large companies. As a result, small company stocks may fluctuate relatively more in price. International and emerging market investing involves special risks such as currency fluctuation and political instability, and may not be suitable for all investors. Bonds (fixed income) are subject to market and interest rate risk if sold prior to maturity. Bond values will decline as interest rate rises, issuer's creditworthiness declines, and are subject to availability and changes in price. REIT investments are subject to changes in economic conditions and real estate values, and credit and interest rate risks.

An investor should consider the Fund's investment objectives, risks, charges and expenses carefully before investing or sending money. This and other important information about the investment company can be found in the Fund's Prospectus. To obtain a prospectus please contact your financial advisor, call (844) 366-0905 or visit www.sa-funds.com. Please read the prospectus carefully before investing.
